experience

Gracenote, San Francisco, CA

Software Engineer - July 2015 - present

- Built the Gracenote Showcase Application from scratch on a Node platform, using the React Javascript framework.
- Continually update the Showcase App with new functionality and deeper interactions with the Gracenote database.
- Review code of fellow developers working on various projects throughout the company.

USA Today, McLean VA

Web Developer - August 2011 - July 2015

- Created standalone data visualizations built on MVC frameworks such as Angular.js and Backbone.
- Collaborated with designers, developers, and editorial staff to create interactives that were both informative and visually appealing.
- Participated in the development and launch of the 2013 USAToday.com redesign.

The Flashband Project, Arlington VA

Co-founder / Lead Front-End Designer/Developer - June 2012 - March 2015

- Created entire layout and organization of site from wireframes to execution.
- Worked with lead developer to integrate front-end style with back end functionality.
- Maintained site operation and appearance across several browsers.

American Institutes for Research, Washington DC

Assistant Web Designer - February 2009 - August 2011

- Managed design and code changes to various websites and online applications.
- Designed the structure and appearance for new online tools for teachers and students.
- Illustrated covers for User Guides and AIR internal pamphlets.

Center for Digital Imaging Arts at Boston University, Washington DC

Web Design Teaching Assistant - June 2009 - December, 2009

- Advised and mentored students as they prepared to enter the job market.
- Critiqued student work and answered questions.
- Taught classes on Photoshop.

Brunner Digital, Washington DC

Web Design Intern - May 2009 - December 2009

- Designed websites and facebook fan pages for clients.
- Assisted in production of print ads and brochure layouts.
- Developed and executed alternate reality game to promote a local concert.
